

Nimbus Cloud — Service Level Agreement & Terms Summary

This document summarizes the key commitments in the Nimbus Cloud Service Level Agreement (SLA) and Terms of Service. The full legal terms are available at nimbuscloud.example/legal.

Uptime Commitment

Nimbus Cloud guarantees 99.9% monthly uptime for the core sync and storage service on Team and Business plans. If monthly uptime falls below this threshold, affected customers receive service credits according to the schedule below:

Below 99.9% uptime: 10% credit of that month's fees.

Below 99.0% uptime: 25% credit of that month's fees.

Below 95.0% uptime: 50% credit of that month's fees.

Credit requests must be submitted within 30 days of the end of the affected billing period.

Support Response Times

Starter plan: email support with a target first response time of 2 business days.

Team plan: email and live chat support with a target first response time of 8 business hours.

Business plan: priority email, live chat, and phone support with a guaranteed first response time of 4 hours, 24 hours a day, 7 days a week.

Refunds and Cancellations

New subscriptions include a 14-day free trial, and no payment is collected until the trial ends.

Customers may cancel at any time from account settings, and cancellation takes effect at the end of the current billing period. Annual plans cancelled within 30 days of purchase are eligible for a full refund; after 30 days, annual plans are non-refundable but will not renew if cancelled before the renewal date.

Data Retention and Deletion

Files deleted by a user are moved to the Trash and permanently removed after 30 days. Upon account cancellation, all customer data is retained for 30 days to allow for reactivation, after which it is permanently deleted from production systems within 60 additional days, including backups.

Security Certifications

Nimbus Cloud maintains SOC 2 Type II certification, renewed annually, and is in the process of pursuing ISO 27001 certification, expected to complete within the next fiscal year. All customer data is encrypted with AES-256 both in transit and at rest.
